

**SeeBeyondBorders** is a not for profit organisation providing children in Cambodia with access to quality teaching and learning at school.

Our aim is to provide sustainable development by helping communities help themselves. Our core program is 'Teach the Teachers' providing teacher workshops, mentoring programs and resources that transfer skills and provide targeted professional development for Khmer primary school teachers. Our 'Better Schools' program provides infrastructure support projects that are part of a holistic solution to improving education and our 'Getting to School' program is community focused, supporting families trying to educate their children.

**Cambodia** is a country of immense beauty and warm people, but the pain of its recent history lies not far beneath the surface.

The legacy of the Khmer Rouge remains a constant factor in the day to day lives of everyday Cambodians. Life remains fragile with living conditions harsh for many. Spending time with Khmers gives one a chance to understand something about their lives and see beyond the beautiful smiles with which they comfort and protect us. Meeting the people is the highlight of this country, rich in contrasts and conundrums. Their stories transport us to places we can barely comprehend and give us a perspective we never knew was possible

**Join us on a trip in the saddle through this ancient kingdom visiting the sights of major historical significance, visiting the people and participating in the work of SeeBeyondBorders as it strives for better outcomes for the children of this country.**
